Abstract of JP 2003118758 (A)

PROBLEM TO BE SOLVED: To provide a container from which a long and thin medicine, food, etc. contained airtightly sealed therein can be easily, surely and singly taken out. **SOLUTION:** This container comprises a container main body 1, a hemispherical inner cap 2 to be mounted on the opening of the main body 1, and an outer cap 3 which has a rubber cap 12 in the center, fits the main body 1 and is able to close the top hole of the inner cap 2. By forming the top slit hole 4 of the cap 2 radially giving consideration to the thickness and the width of a content, the airtightness during storage is improved and a single content 15 can be easily and surely taken out with no possibility of many contents coming out at once.
